

## Dr Bob Swart - HeadConv

### Summary

HeadConv is used to convert C headers to Delphi Lib files. See <http://www.drbob42.com/headconv/>

Usage: HeadConv filename  
will generate the explicit (dynamic) Delphi import unit,  
where filename.H is the C DLL header file.

#### Command-line Arguments:

- o to force overwrite of pascal unit on disk
- x to force generation of eXplicit import unit (dynamic)
- m to force generation of iMplicit import unit (static)

Example: HeadConv SAMPLE -o
